Insurance, IT Company,  
Retail, Public Sector,  
Bank&Finance,  
Technology Startup, E-  
Commerce

## Preferences

### Location

European Union only

### Current status

Open to Discuss  
(Updated: 14 hours ago)

## Personal Statement

I'm involved in software testing and DevOps activities for more than 10 years. During this period I had hands-on experience with every aspect of software testing activities. I can handle any complex management or technical task. Can easily switch from manual testing to automation or non-functional testing. Prepare regression and acceptance test plans according to business goals and risk analysis. Can lead Scrum team and help the team to find the best approach for testing in Scrum team.

A perfect project should have very challenging tasks from both management and technical aspects.

## Skill Stack
