months)

### Current status

Working (Hit me with  
offer) (Updated: 4 days ago)

### Workload

100%

## Personal Statement

Gunveer is an Enterprise Solutions Architect with thirty years' experience of collaborating with senior Business, IS and Operations stakeholders to deploy enterprise solutions. He shapes and drives large scale mission critical solutions covering application, database and infrastructure layers in complex multi-supplier environments.

Most recently he has delivered ERP on cloud (Oracle NetSuite) with MDM capability (via Orchestra Networks EBX5) using Integration via cloud (Dell Boomi) to connect with CRM and the wider solutions landscape.

He has extensive experience of delivering business support systems and working with third party suppliers and vendors on major projects with budgets ranging from circa £5m to £40m and teams of 3 to around 100 with user bases of 500 to 5000. Gunveer has a proven track record in formulating roadmaps and technical plans that get technical teams and stakeholders working together to a common framework.

His leadership, communication and negotiation skills have served him well in getting collective buy-in and commitment in the midst of complex organisational dynamics that are there in any organisation. He has a proven ability to develop and communicate sophisticated 'rich' deliverables at exactly the right level for the intended audience. He takes a strategic 'big picture' view whilst adopting a pragmatic approach to delivery.
