Aprašymas:

Badgecraft team is looking for a UX/UI designer to join us in developing design of www.badgecraft.eu platform and new complimentary products.

UX/UI designer will create design solutions in collaboration with the product manager and programmer. We are looking for design solutions that are not only pretty but also considers well usability. We expect that designer is able to argument decissions and explain ideas; is following new design trends, UX research.

Work conditions:

- New product will be developed during 2-3 years period, therefore we are looking for long-term collaboration with UX/UI designer to create, test and improve design solutions
- Wrok schedule and time planning will be done in advance, in collaboration with the team
- We work with international partners, there may be a need to have meeting abroad
- Payments will be counted based on the work

delivered and made based on the issued invoices
for design services delivered

Requirements:

- Good understanding of how UX/UI design is developed and tested
- Ability to work in a team with programmers and find solutions that benefits both sides
- After agree on the design specifications, ability to work autonomously, plan and deliver tasks independently
- Willingness and ability to continuously learn
- Reliability and keeping with agreements
- Good communication skills in English

Big plus:

- Has previous experience of conducting user research and testing of web design prototypes with users
- Follow Design thinking approach
- Used before Figma.com or inVisionapp.com for prototypes

When responding, please include references to your design portfolio

Payment: based on agreements
