Aprašymas:

Our client in Vilnius is looking for a Cloud Solution Architect

Responsibilities

- Govern technical implementation of IT solutions designed and implemented in accordance with organisational guidelines, standards and best practices
- Work on development and definition of standardized cloud solutions, guide and support internal engineering, delivery and sales teams in understanding and adaption of these solutions
- Work closely with internal product teams, engineering and architects to ensure overall integrity and scalability of solutions
- Deliver solution architecture for enterprise level customers based on public cloud
- Continuously learn new elements within public cloud

Minimum qualifications

- 2+ years of solution development experience including proven experience developing solutions in a cloud environment
- In-depth knowledge of one of the major clouds (AWS, Azure, GCP)
- Extensive experience with enterprise or product architecture, design and implementations
- Experience in structured methodologies for the design, development, and implementation of

cloud infrastructure solutions
- Experience with Agile methodologies (Lean/Kanban/Scrum)
- Solution-oriented, structured, highly technical and analytical personality
- Understanding of DevOps culture and principles
- Solid understanding of some of following subject:
- – IT-security and governance
- – Automation and orchestration
- – CI/CD DevOps practices

Preferred qualifications

- Emphasis on Information Security
- Experience with Azure cloud technologies in IaaS, PaaS and SaaS
- Excellent communication skills
- Understanding of software development processes
- Knowledge of programming and scripting languages

The Client Company is building the next generation cloud solutions. Our mission is to empower enterprises to grow digital innovation and become disruptive through the usage of process automation, Cloud technology and methodology. They are changing the way that IT is delivered to enterprise organisations, replacing hard to build and operate technology with easy consumable cloud-based services. They assist their clients in successfully delivering services to their customers by establishing and securing a path into the cloud through automating and self-service enabling IT-delivery.
