Aprašymas:

Our IT department is responsible for the implementation of Bankera's ecosystem solutions that are designed to provide a new way of managing personal and business finances. **Java Developer jobs at Bankera** include building and implementing new features to our cutting-edge platform, as well as cooperating with international partners for payment and other integrations. Your skills and passion for your profession will help redefine the future of finance.

You should find it interesting to

- Implement new functions and features in our products
- Deliver a clean, high quality, well-documented, and tested code
- Collaborate with Front-End developers to build and maintain new interfaces and products
- Mentor other developers

You will work with

- Java
- Spring Framework
- Microservices and Docker
- PostgreSQL
- Kafka
- Event-driven architecture
- Golang

We would love you to have

- Attention to detail
- Good problem-solving skills
- Ability to find creative, innovative solutions
- Empathy and ability to work in a team
- Analytical mindset

Salary

Salary for this position ranges from 900 to 3300 EUR for junior and mid-level specialists. For senior level specialists, salary ranges from 3300 to 8200 EUR (before taxes). The final offer depends on your experience, competence, and motivation.

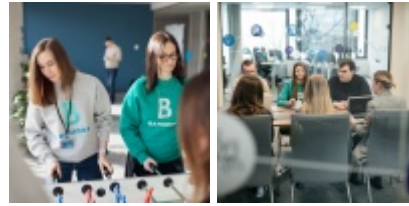

Perks of working at Bankera

- Flexible working hours
- Competitive salary
- Exciting and challenging FinTech based projects
- Modern offices with a solid IT infrastructure
- Professional and personal development
- Office perks and company events
- International and talented team
- Progressive vacation policy
- Employee referral program

Should you feel that your skills and experience match the above we would be delighted to receive your application. Confidentiality is guaranteed.

By applying for this job position you confirm you have read and understood the Candidate Policy Notice (<https://careers.bankera.com/en/candidate-policy/>).
