Aprašymas:

Job description

In near term you would be part of the team working on a gov-tech startup that is creating electrical safety/fire safety audit solutions.

Mainly we are looking for a long term colleague who will relentlessly solve problems and write good code on projects that are existing and yet to come.

We expect that you:

- Have 3+ years of hands on experience working with web applications
- Know how can handle both frontend & backend of an application
- Have worked on projects built with React
- Have experience working with .NET Core as a backend solution

Nice if you have experience with:

- Azure
- MaterialUI
- Redux
- MongoDB

What we offer

- Above market salary is an obvious one
- As a young company we offer a place to be among the first ones who will create company's culture, standards & policies
- Working closely with experienced developers where knowledge sharing & good code practises are encouraged
- Build custom powerful PC & choose software you need
- Work remotely or from office in Vilnius

Reikalinga Patirtis
