## Description:

### Junior Full Stack Engineer

The Junior full stack engineer designs and develops software applications. Performs coding, debugging, testing and troubleshooting throughout the application development process with a focus on adding value to our product line.

The Junior full stack engineer is expected to be a good communicator with the ability to cross function with other Development team both Internal and external. The engineer should be able to make appropriate decisions of how to tackle complex technical challenges from a coding and infrastructure standpoint.

We are looking for someone who has:

- Strong knowledge of JS ecosystem, specifically Node.js and TypeScript
- Experience in React ecosystem (redux, hooks)
- Understanding of javascript build system (webpack)
- Experience with RESTful web services
- Experience working within a continuous integration and deployment (CI/CD) environment
- Comfortable with git/github
- Minimum 3 years' software engineering experience

- Write well designed, testable, efficient code
- Fluent in English, written and spoken

#### About Results CX:
