Vilnius, Lietuva

Projektas nebegalioja

Aprašymas:

Group Finance Solutions is one of the Core Banking IT & Data departments, responsible for smooth financial systems and financial data delivery to CFO area – be it daily liquidity management, general ledger system, internal or external financial reporting. We invite you to join a global department – operating in Vilnius and Copenhagen.

In Vilnius we are building a team for Core Financial Solutions, who will be primarily modernizing the current Accounting IT Solutions. This means, that you will be responsible for bringing a fresh view on how one of the back-bone systems in the whole Group has to transform.

Working with your peers, you will be leading the design of the future system, building its components and integrating them into the complete IT ecosystem.

Skills

- Proven experience in developing in C# on .Net
- Proven experience designing and building APIs
- Knowledge in using build and deployment pipelines for cloud services using Docker, Kubernetes and other technologies

- Knowledge on Microsoft SQL Server data platform
- Data analysis and database modelling
- Knowledge of database solution architecture and integration
- Good understanding of development lifecycle process
- Good communication skills in English – both written and verbal

Our current technology stack, which you will influence moving further:

- Microsoft Visual Studio, C#
- Openshift, TFS, GIT, Red Gate, SonarCube, …
- MS SQL Server
- SSIS, Data Stage and other ETL technologies

Mission

- Take a leading role in our journey to build industry leading cloud based accounting solutions using modern tools and technologies
- Coordinating a broad span of assignments for other developers – in the backend, including API and database integration using C# and Microsoft tools
- Use your knowledge to implement and ensure that we have the best setup on CI/CD and integrations to a variety of modern tools and systems
- Ensure that we build, develop and run software in a DevOps setup within strong teams using agile working principles
- Have direct impact on how we design and build our solutions
- Enjoy building an organization where you can put your knowledge to work and the same time learn a lot from your colleagues and assignments
- Working closely with other developers throughout the organisation to ensure development is in par with development guidelines and best practices
- Managing personal time in the best manner and taking responsibility for technical decisions
- Staying pro-active in learning new skills and industry best practices to position our solutions as top-quartile in the business
- Enjoy and sustain an informal and pleasant working environment

We offer:

- An inspiring environment in a large IT organization

- A perfect opportunity to join an IT team and face the challenge and the opportunity to influence and shape the team in Vilnius
- Work in an international team, which concentrates on innovative business facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
- Highly skilled team and career opportunities
- Cross business career opportunities in bank
