Description:

Kilo.Health is a digital business working in the health industry. Our main markets are USA, Canada, Australia, Brazil, Mexico & UK. The company was founded 5 years ago and it took a while to find our niche. Though we did it and now we strive to be the leader in the wellness category globally. Don't wish us luck, come work with us to see it happen.

We are looking for a dedicated **PHP Developer** to join our tech team. You will work on high-scalable products, cloud-based infrastructure with enormously fast release cycles and participate in challenges with team members who are best engineers in their class.

Take your career to the next level and shape the online experience of millions of customers in over 180 countries by building the best online health market products and software infrastructure.

Get Ready To

- Work on high-scalable products with PHP7 hosted on a cloud-based infrastructure.
- Build RESTful APIs that ensure a fast & reliable workflow of our products.
- Working with multiple production grade zero-downtime platforms that is used by millions of our clients.
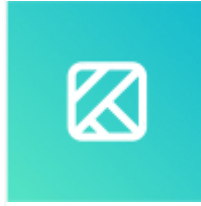

- Expand your knowledge of software architecture development process while solving challenging tasks.
- Work with agile processes that are adapted to the team's and project's needs
- Keep involved in our business oriented MVP level projects and work with fastest ever release cycles.
- Participate in Hackatons to test new possible MVP products in the market.

We Expect You To

- Have MVP-focused coding skills in PHP. Min 3 years (Mid-level) or 5 years (Sen-Level)
- Have experience with Laravel, Symfony, Zend or Yii2 Frameworks or pure PHP.
- Have experience and knowledge of RESTful API's (or GraphQL)
- Have solid background in building scalable distributed products and practical experience with Caching
- Have knowledge of MySQL, PostgreSQL or similar RDBMS.
- You cannot push one line of code without reviewing it twice, refactoring is part of your daily workflow and you actively keeping the quality of the code base in check.

You Are Going To Deal With

- Full set of perks including a hot tub in a terrace, workations (pity you missed Bali already) as well as taxi & gym monthly budgets.
- Any technical gadgets that you want to play with (Alexa, watches, Raspberry Pi, Smart Mirrors, Robots, etc).
- Your preferred hardware and software stack.
- Any learning content subscriptions (lynda, laracast, etc).
- Informal communication. We are not a corporate office, we are digital punks.
- Many mistakes though never the same mistake twice. We experiment – a lot, since no one has ever done what we are doing.
- Digital products in the health industry which acquires thousands of daily new customers globally.
- Weekly new introductions. Our team grows faster than construction workers are breaking the walls to expand our office.
- Feel excited already? It's our daily emotion.
