### Aprašymas:

Harbortouch Payments, LLC is a leading business technology company and pioneer of the POS-as-a-Service business model, having served over 300,000 merchants in 17 years in business and currently processing more than \$12B annually. The company offers a revolutionary free equipment program that delivers best-in-class POS systems with no up-front costs, including state-of-the-art hardware, premium software, custom programming, professional installation, onsite training and 24/7 support. We are focused on delivering unparalleled value to our clients and are driven by innovation, design, and technology.

### SENIOR FRONT-END SOFTWARE ENGINEER

The Lead Management System (LMS) is the workhorse of Shift4 Payments' entire salesforce: as a member of our team, you will take part in crafting the sales workflow for US industry leaders such as Harbortouch, POSitouch, Future POS, and Restaurant Manager. It's an advanced lead management, reporting, communication, and operations tool that's woven into the infrastructure of our corporation. Built to bring the efficiency of thousands of our dealers to a whole new level, LMS

helps us drive the value and intelligence of our corporation and integrates with a vast ecosystem of internal CRM tools.

We're building this greenfield project with all those exciting technologies everyone keeps talking about: React, React Native, Node.js, TypeScript, Docker, and AWS. Our freedom, flexibility, and enterprise-level commitment to quality makes it possible for us to deliver a truly great product—there's no time for mediocrity. Working with us, you'll have a chance to participate in all aspects of product development, from writing code to facilitating processes and helping come up with features.

As a Frontend Engineer, you will be joining a small dedicated Scrum team which feels more like a family than anything else. We value openness, growth, responsibility, and teamwork, and we hope that you have the same attitude.

#### **Requirements:**

- At least 5 years of experience building commercial software;
- At least 2 year **Javascript** and related tools like **react.js** experience;
- Proficiency in HTML5 / CSS / SASS;
