Description:

Hexito is a fast-growing IT solution company specializing in custom system creation and integration into existing and new business modules.

Our team needs more hands and a fresh mind - we're looking for Senior PHP developers!

What you will do:

- write clean, maintainable and test driven code;
- deliver and maintain technical design, code and documentation;
- develop, review and support systems, with the goal of optimizing them for best performance and stability.

What we expect:

- at least 2 years of experience working with PHP (Laravel/Symfony);
- good understanding of ReactJS/VueJS;
- teamwork experience;
- unit, feature, automated tests is something that is very familiar to you;
- passion for technologies and desire to try something new;
- a technical mindset with great attention to detail;
- responsibility, independence, results orientation;

- good English language skills.

If you have working experience with Docker, Kubernetes, Gitlab CI, Microservices, ElasticSearch, Redis – it's even better!

What we offer:

- work in a promising, fast-growing company, together with skilled professionals;
- an exceptional approach to code quality;
- training and professional development opportunities;
- a stable salary that will grow along with your growing competence;
- interesting projects that will provide space for your creativity and self-realization;
- a work environment based on cooperation, trust and responsibility;
- a competitive salary (2500 - 3500 eur/mon. net), depending on your skills and ambitions to create added value.

We hope that you like:

- flexible working hours and ability to work remotely;
- health insurance;
- training courses, seminars, conferences;
- team socials;
- birthday === a day off;
- modern office with free parking.
