Aprašymas:

Here at Visma Lietuva we offer exciting challenges in one of Scandinavia's largest IT environments. We are establishing a new team in Lithuania which will work with the leading Magento solution provider in the Nordics. You will become a part of a team of talented and highly motivated developers who create and deliver outstanding e-commerce solutions for the Scandinavian market.

What's it all about?

- Develop Magento functions and functionality.
- Develop Magento extensions/modules.
- Develop and create integrations towards 3rd party software.

What do we expect?

- 4+ years of relevant experience in programming web applications with LAMP stack (Linux, PHP, Apache, MySQL).
- Hands-on experience with any Linux distribution.
- Strong OOP skills.
- Advantage would be an experience with any of open source e-commerce platform like Magento,

WooCommerce, Prestashop or OpenCart.

- Good spoken and written English skills.

What should you expect?

- Exciting challenges in one of Scandinavia's largest IT environments.
- Talented and highly motivated colleagues developing world-class products.
-
- Working with international team of experts, using cutting edge technologies and tools.
- Together with developers and QA you'll take on best continuous delivery and Scrum practices.
- Investments in Your professional development, conferences and events, books, knowledge sharing sessions and other learning opportunities.
-
- Engineer oriented environment, regular and relevant team buildings, hobby clubs, Kudos points, pizza Fridays and much more.
- Flexible working hours.
- Health insurance (including Gym membership).
