Description:

We are looking for a **web developer** to join one of our client's team. Our client needs engineers experienced in all areas of web development, who can move freely between client and server side. You will be working from our offices in central Stockholm.

Who you are:

- You have a passion for software development in general
- You love to tackle interesting challenges.
- You are adaptable and resourceful and you are able to develop effective solutions to problems.
- You understand when it's better to go for the quick win and when it's better to drive through a comprehensive technical solution.
- You understand that development means teamwork and enjoy working with cross functional teams.
- You are curious and passionate about constant learning, also going outside of your usual domain.
- You have a quality mindset in your approach to your work.

Technical knowledge needed:

- HTML, Javascript, CSS
- PHP
- Java or Python

Technical knowledge wished for:

- Symfony or any other PHP framework
- Component-based frameworks e.g. React

Seniority: 5+**Required Skills**

WEB

CSS3 3-4 years

HTML 3-4 years

PROGRAMMING

Python 3-4 years

JavaScript 3-4 years

PHP 3-4 years
