Team lead - Java Software Developer

UAB Probanx Solutions

www.probanx.com/

Vilnius, Lietuva

Aprašymas

Looking for an exciting work in finance and technology but don't want to work for a bank?

Join the team at **ISX Financial** working on cutting edge solutions in identity verification, payments, core banking, financial markets.

We're looking for a Senior Software Developer to work on amazing new and existing products. This job will be appealing to avid technologists who enjoy the craft and working with best and innovative technologies and oftentimes on greenfield projects.

Deliver solutions to our customers:

- · Own scope of work, from software design through coding, testing and into delivery and maintenance
- · Write quality code and meet deadlines
- · Do peer code reviews and collaborate with other engineers on product development
- · Develop and maintain automation and CI/CD in and around the development process

Technology & Qualifications:

- · Experience with and knowledge of languages and technologies from the list: Java, Kotlin, Spring, Python, Node.js, RDBMS, NoSQL, microservices, Kafka, Kubernetes, AWS services,

Terraform, blockchains and smart contracts, crypto, APIs and frontend stack
- · Readiness to learn and use new languages and technologies
- · Bachelor's degree in Information Technology or Computer Science
- · Certifications in software development and technologies are a plus

Preferred Experience:

- · Financial industry
- · Software product/SaaS development
- · Technology consulting

What we offer

- Industry-leading salary
- Private health insurance plan participation
- Performance Bonus

Interested applicants are encouraged to apply by sending their CV to careers@isxfinancial.com quoting "Java Team Lead / Engineer".
