Yes

#### Expire On

2021-11-30 (9 hours from now)

### Description:

We are looking for uber passionate experienced testers to join the software product team responsible for designing, developing, and deploying Shift4's new built-for-cloud restaurant platform that delivers on a complete solution for restaurant operators of all sizes that marries point-of-sale, guest engagement, online & mobile ordering, payments, analytics, table reservation, loyalty and much more (we call this platform "Edgewater").

The main focal point of the platform consists of beautifully designed and highly functional Kotlin business apps deployed on both custom and consumer hardware. We have huge plans for this platform and need to expand the team with the best and brightest to ensure we continue to out-innovate competition and change the basis of competition.

### Responsibilities

- Thorough testing of high-performing business solutions using manual testing.
- Review product requirements and define test cases to match expected functionality.
- Be an active participant in a high-velocity scaled Agile process.
- Collaborate cross-functionally with Business Analysts, Developers, and other team members to achieve elegant solutions which satisfy business needs, goals, and objectives.
- Provide recommendations for continuous improvement of development processes, technical solutions, and Edgewater itself.
- Diagnose and resolve issues with deployed systems using a variety of techniques including

direct engagement with support personnel and customers.

## Requirements

- 2+ years of hands-on experience testing Android apps (Java, Kotlin) targeting both business users and consumers.
- Be attentive to details and show an aptitude for problem solving.
- Working knowledge of test management tools (Jira, TestRail are a plus)
- Strives to ensure that solutions are a great fit and use to the target end-user persona.
- Experience working in an agile software development lifecycle (SDLC) by designing, developing, and deploying working software through analysis of functionality as defined by a Product team.
- Expertise and focus around restaurant point of service apps (POS, Kiosk, online ordering) is a big plus.
- Proficient with testing work-in-progress deliverables to make sure they meet acceptance criteria and functional requirements as defined by a Product team as well as non-functional requirements defined by the development team.
- Great interpersonal, verbal and written skills including documentation of complex technical solutions.
- Driven and wants to be part of a highly productive team that delivers products on a continual basis.
- As said above, Expertise and focus around restaurant point of service apps (POS, Kiosk, online ordering) is a big plus.

## Benefits

- A growing innovative company with a friendly atmosphere,
- Library, training, online courses, and conferences to improve your skills,
- Unifying events and team buildings,
- Remote workout classes,
- Competitive salary and performance-based bonuses,
- Additional vacation days,
- Health insurance,
- Salary starting from 2500 EUR / gross.

## Required Skills

### PROGRAMMING

Java 2-3 years

Kotlin 2-3 years

### ROLE EXPERIENCE

Quality Assurance Specialist 2-3 years

### LANGUAGE SKILLS

English Proficient Business Level (C1/C2)
