Aprašymas:

Currently our client Exadel is looking for a detail-oriented smart **Senior Business Analyst.** You will play the main role in linking our information technology capacity and our business objectives. Your main goal will be to support and ensure the successful completion of analytical, building, testing and deployment tasks.

About Exadel:

Since 1998 Exadel has been engineering its own software products and custom software for clients of all sizes. Headquartered in Walnut Creek, California, Exadel currently has 1000+ employees in development centers across America, Europe and Asia.

About the Project:

The Project deals with broadcasting of Court sitting. Strong developers that can make good choices on behalf of the client, and communicate those choices effectively are wanted. On the front end they would use React or Angular. The team should evaluate several 3rd Party Video services, and see which is the best fit.

Microsoft Azure or Amazon Web Services would be used for hosting the production environment. Both have Canadian Data Centers. Using Canadian Products, and Services is strongly encouraged

Requirements:

- Minimum of 3 + years experience in business analysis or a related field

- Exceptional analytical and conceptual thinking skills

- Ability to influence stakeholders and work closely with them to determine acceptable solutions

- Advanced technical skills

- Excellent documentation skills

- Fundamental analytical and conceptual thinking skills

- Experience creating detailed reports and giving presentations

- Competency in Microsoft applications including Word, Excel, and Outlook

- Excellent planning, organizational, and time management skills

- Understanding of requirements, its different types, and stages (elicitation, analysis, documentation, validation and management)

- Understanding the full software development lifecycle

English level

Upper-Intermediate

Responsibilities:

- Be a proxy between product owners, development team and project leaders, helping to improve development team effectiveness

- Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions

- Leading ongoing reviews of business processes and developing optimization strategies

- Staying up-to-date on the latest process and IT advancements to automate and modernize systems

- Documenting and communicating the results of your efforts

- Effectively communicating your insights and plans to cross-functional team members and management

- Gathering critical information from meetings with various stakeholders and producing useful reports

- Ensuring solutions meet business needs and requirements

- Prioritizing initiatives based on business needs and requirements

- Monitoring deliverables and ensuring timely completion of projects

Benefits:

- Attractive salary,

- Personal development,

- Language classes with a native speaker,

- Flexible work schedule,

- Friendly work environment,

- Interesting job in an innovative company with the latest technologies,

- Collaboration with a team full of interesting people.
